

# Bidirectional Fans

*compact and lightweight*

The bidirectional fans manufactured are used on suction/blower fan-assisted professional ironing boards. This highly performing item is produced in various versions with sizes ranging from a minimum of 120mm to a maximum of 220mm and a thickness of 38 to 60mm that

makes the component compact and lightweight. The structure of the Hauser is aluminium, with polycarbonate impellers reinforced with self-extinguishing fiberglass in compliance with UL 94 V 0. It has a ball bearing-mounted capacitor star motor. This fan has obtained the following certifications: TÜV, CSA, UR and CE.
